

# 1xINTERNET expands into the Netherlands by joining forces with React Online

*Europe's leading Drupal agency strengthens its position in the Benelux and advances its commitment to digital sovereignty*

1xINTERNET, one of Europe's largest Drupal agencies, announces its expansion into the Netherlands through a strategic partnership with React Online, a Dutch digital agency with more than 25 years of experience in software engineering and digital innovation.

With this step, React Online becomes the Dutch subsidiary of 1xINTERNET, marking a significant milestone in the company's European growth strategy.

## **Strengthening Europe's digital ecosystem**

As digital transformation accelerates fast and AI reshapes industries, organisations across Europe are placing increasing importance on digital sovereignty, maintaining control over their data, infrastructure, and digital services.

By joining forces, 1xINTERNET and React Online are strengthening their ability to deliver sustainable, scalable digital solutions built on open source technology and European infrastructure. The combined organisation now brings together more than 90 experts across Europe, serving international clients including the Union for International Cancer Control, the City of Reykjavik, Nestlé, BMW, Heineken and Sharp Electronics.

## **Expanded expertise and capacity**

The partnership strengthens 1xINTERNET's capabilities in:

- Enterprise Drupal and React development
- AI-driven digital platforms
- Digital strategy and scalable architecture
- Cross border project delivery

React Online contributes deep technical expertise, a strong presence in the Benelux market, and long standing client relationships. The Eindhoven based team will continue operating locally, ensuring continuity for existing clients while benefiting from the broader expertise and capacity of the European team.

## **Leadership continuity in the Benelux**

Imre Gmelig Meijling will take on the role of Sales Director for the Benelux, focusing on regional growth and long-term client partnerships. Jean-Paul Vosmeer becomes Managing Director of the Dutch subsidiary, continuing to play an active role in client strategy and solution architecture.

## **A Shared Vision**

“What convinced us the most in taking this big step, was the strong cultural alignment,” says Baddy Sonja Breidert, Managing director at 1xINTERNET. “We share a sincere belief and passion in open source, digital autonomy, data protection, and sustainable growth. Now we become even stronger in building a European alternative for organisations that value independence and long term digital cooperation.”

This expansion reinforces 1xINTERNET’s ambition to shape a robust European digital ecosystem, combining technical excellence with strategic vision.

For existing clients, there will be no changes to current projects, contracts, or contact persons. The partnership primarily strengthens expertise, capacity, and cross border collaboration.

## **About 1xINTERNET**

1xINTERNET is one of Europe’s largest Drupal agencies, headquartered in Frankfurt, Germany, with a team of more than 90 experts across Europe. The company delivers enterprise grade digital platforms built with open source technology, serving international organisations and global brands.
